Guillermo **Moñino Cánovas**

Telecommunications Engineer - Software developer - Data Analist - Musician

About me

Skilled telecommunications engineer with knowledge of Big Data and Digital Signal Processing and experience as Software developer.

Through my career and side projects, I've honed my coding proficiency as well as communication, organization and managment skills.

I am currently seeking to reorient my career path to match my interests and areas of expertise.

Personal

Guillermo Moñino Cánovas
Nationality: Spanish
1999

Areas of specialization

Digital Signal Processing · Software development · Data Science · Machine Learning

Other interests

Music writing & production
Audiovisual projects
PCB Design
Videogame development

Languages

Spanish · Native
English · C2
French · B2
German · A2

GitHub

EXPERIENCE

2024–Present

SAP Consultant | Stratesys
JUNIOR · Valladolid
Currently working in the international SAP implantation project for HORSE (RENAULT's automotive factory).

2023–2024

Software developer | Capgemini Engineering
JUNIOR · Murcia
I worked as a backend developer for a couple projects based on Java + SpringBoot. My tasks consisted in developing new features as well as implementing unit/integration tests for the whole backend.

2022–2023

Software developer | BMAT Music Innovators
INTERN · Barcelona
I did my internship in BMAT where I developed a web application based on Django + PostgreSQL and I participated in a Machine Learning project that I used for my master's thesis.

STUDIES

2023

Big Data & Data Science
BOOTCAMP · Tokio School

2023

Telecom Engineering
M.S. · Polythecnic University of Valencia

2021

DSP Engineering
B.S. · University of Alicante

PROGRAMMING

I know quite many languages and tools. These are the ones I'm most familiarized with:

- Python
- C++
- Matlab
- TypeScript
- Java

SIDE PROJECTS

2018–Present

Musician / Producer
DIFFERENT ROLES · Spain
I've been participating in several music projects since my teen years. Although far from the technical knowledge and agile methodologies, I have learned most of my project management and organization skills from them.

2024–Present

Audio plugins developer
SOLO PROJECT · Home
In order to further my understanding of DSP, I started developing some audio plugins to emulate the behaviour of guitar pedal effects. So far, I've recreated 6 pedals with great accuracy.
